Exports A separate 3D engine named CAdd3DExports was introduced in Autodesk Architectural Desktop 2008. It is a separate application that can be used to view and edit 3D design information in drawings. The AutoCAD DXF file format is not used, and the 3D data cannot be edited in the same way as 2D data. CAdd3DExports is designed to work with several 3D CAD tools, including: AllegroCAD (GIS CAD) ArchiCAD (free architect tool) CorelDRAW (photo-editing and layout software) Design Review (DSW/VSA project management software) EasyCAD (a tool-less structure and BIM authoring tool) Eric3D (3D architectural visualisation tool) Fe-Fom (web-based architectural visualization tool) IronCAD (architecture management software) DXF is an independent, ISO/IEC 15930 specification for exchange of 2D CAD data.
