
Flash Disk Lock 1.7

[Download](#)

This article describes a software utility used to temporarily lock a flash drive. It is designed as a simple way to provide. Secure storage of data on the flash disk. It does not matter what data is stored on the locked disk, what is important is that no passwords are stored on the disk. The program can also be used to prevent accidental deletion of files. The program "Flash Lockscreen" (FLLC) allows you to lock a flash drive using a password. By using this program, you can be sure that no one else can read your data.
