
Oracle Jinitiator 1.3.1.22 For Windows 7 Free Download

October 1, 2012 - Hello everyone, I'm using jinitiator 1.3.1.22 on Windows 7 with Explorer 8 or Firefox 3.5. I install jinitiator manually and latest java plugin. And it works until the computer is restarted. When I restart my computer it doesn't work. This happens every time I try to connect to the Google server and allow access to my admin account. How can I solve the problem? If I remove jinitiator manually and restart my computer it starts working again. When I try to connect to Google using Firefox it doesn't work again. Firefox has an option "Don't allow login when jinitiator is not running".
