PngOptimizerCL Crack + X64 (Updated 2022)

The below option (macro) can be defined in PngOptimizerCL if you want to support different kind of compression. bkGD=1 (if background color is desired) bkGD=0 (if background color is not desired) tEXt=1 (if text is desired) tEXt=0 (if text is not desired) rTXt=1 (if raw text is desired) rTXt=0 (if raw text is not desired) Where: bkGD = Background Color (G) tEXt = Text (E) rTXt = Raw Text (T) EXPERIMENTAL: Automatic PNG Chunks Output Removal EXPERIMENTAL: Autocalculation of Pixel Width/Height, Orientation, Resolution, Color Space, RGBA String Chunks etc. To enable the optional features in the application, the bpp parameter must be set to 0 or 1. If it is 0, automatic chunk removal is turned off. If it is 1, automatic chunk removal is turned on. bpp Specifies the number of bits per sample, or the number of bits per pixel. Specified as either 1, 2, 4, 8, or 16. If it is 0, automatic chunk removal is turned off. If it is 1, automatic chunk removal is turned on. Parameters: Input filename - Input filename. When input is a filename, the application reads the PNG file from stdin. Output filename - Output filename. When output is a filename, the application writes the PNG file to stdout. The filename can also be specified as an argument to PngOptimizerCL.exe. Path - Path for where to locate files. If you want to write a PNG file to a different location than stdout, specify the full path to the file. TimeStamp - Time stamp for the file. If this option is present, the current time will be printed to stdout. The default time stamp is taken from the local system time (machine specific). Requires: PngSplit (to be installed on the system. If no PngSplit tool is found, the application will abort. Options: RemoveBackground=1 (if background color is desired) RemoveBackground=0 (if background color is not desired) KeepRaw=1 (77a5ca646e
