
Silent Hunter 5 Activation Code Crack ^HOT^

gta 5 activation code re-download factory reset item id new download social club 1.2 This bug causes the game to crash on loading a particular map. Here is a workaround: 1. delete the file called 01.map (or if you Fix for "Alphaville" is not activated. (special thanks to Daniel Vernon) The game crashes with the following error message: Invalid Hotspawn Data If you just copied the solution from a website, here is what you
----- The game corrupts itself on start, when the game attempts to load the 00.map file. One possibility is to copy the solution from this website before crashing, to prevent the corrupt from starting. If you copy the solution to the map file, the console will print something like: 00.map is fixed. 0% data corrupt. "File Unwriteable The.file extension is added to the files by the game in the save game directory and by other programs when you copy them. Deleting the extension removes the attribute from the file. This is just a workaround. 1.3. The game crashes because some files in the save game are read only. Here is an automatic fix that should solve your problem (and save some time): - Delete the following files from the save game directory: SAVE 0.11 MAP01.BIN SAVE 00.11 MAP01.BIN SAVE 01.10 MAP01.BIN From patch 1.1.4, the files become read only as a temporary fix. I suggest to start with folder 01. The game should be able to read this folder. If not: try with MAP 01 instead of 00. - All manually made save files are saved in the 01 directory as well, so you can delete them if you have already been through this solution. Update: I have just discovered that even if I delete all files starting with 01, if I subsequently check the file permissions of all files starting with 00 in 01, I can see that all of them are read only after the patch. 2.0. Install the following updates: - patch 1.1.6. *- UPDATE - patch 1.1.5. *- UPDATE - patch 1.1.4. *- UPDATE - Update to the latest patch level
