Read more at for the 'iPod' tag Over a year and a half ago, I wrote a post about the emerging serious issues with the iPod's internal batteries. Unfortunately, when I wrote that post I was basing my view on media reports and a superficial examination of the small amount of information that was available at the time. Back then, Apple said they had designed all of the new iPods to function for 10 years without a recharge, which is something that has been known since the previous generation of the iPod. Back then, Apple also said that they had designed the new battery to be even safer than the previous generation's. On Monday, things have changed. By now, of course, you all know that a lot more information is available about the new battery and it's design. And it turns out, those reports weren't wrong. The new battery is not 10-years safe. My latest post, the final in this series on the new battery, summarizes what I've learned so far. To summarize, if the iPod 6th gen is even slightly bricked (in other words, if the battery stops functioning in the middle of a long listening session), then you would not be able to make calls with it or sync with most iTunes library. It's that bad. In theory, there are two ways to replace the battery. The first is with what Apple calls a Battery Pack. This can be attached directly to the iPod using a small 3-1/2" by 2" bay that is located to the left of the screen on the iPod's top panel. It is available in several capacities, ranging from 20 mAh up to a whopping 7.4

Ah. The Battery Pack can be removed and replaced just like the previous generation's battery. The second method is to have Apple send you a replacement battery. This is not ideal because most models take between two and three weeks to ship, but it's at least a better option than the iPods being bricked altogether. In the end, you might 09e8f5149f

The principle of classification in meBiblio is based on relations. You can link various types of publications (literature items) to each other; for example, you can combine journals and conference proceedings to one paper. You can also search inside the database for literature items that match your needs. Using the classification treeview and the relations in the database, you have a quick view over the items' properties and characteristics. The application allows you to control and change the relations. Furthermore, meBiblio will retrieve your references automatically from the bibliographic databases PubMed, PubMed Central, DOAJ, Web of Science, Google Scholar and other sources. You can configure meBiblio as a source for your references. Each bibliographic database has its own interface. More than 130 variables like author, title, year, subject, journal, ... can be used to separate references. Each classification treeview variable has an internal path to related classification tree

WESTVLE A space to share our love for the kids of West Virginia, providing the kind of support and resources that foster parenting teams need to meet their needs. We use our space as a way to advocate for and support the systems that are needed to ensure the well-being of foster children. West Virginia is the 50th state in the United States and is often overlooked by the general public, yet foster children are often some of the most vulnerable children. Currently, there are 6,500 children in foster care in West Virginia, a rate of one child per seven hundred. More than 1,500 of these children in foster care were reported abused or neglected by their parents. Thank you for donating to the West Virginia Foster Care System. Contributing has been made possible by a grant from the U.S. Department of Health and Human Services, Administration for Children and Families, Children's Bureau.Q: transparent background for a html document My main document body is a very long white table. The table has a background color, but the table cells have a background-color, but both together make it look a bit dark. How can I make it so that there's only one background color that goes on the document, and it's transparent? A: You can use an iFrame for a completely transparent background:
