ANNOUNCES RELEASE OF “ABNORMALLY HOT” NEW GROWTH RATE - LAUNCHES WORLD WIDE The newest grocery store chain innovation - New Terra - today announced that it will be releasing an exclusive new “Abnormally Hot” growth rate for both food and other grocery items. The new Grow-Rate will be included for all stores this Fall. It is anticipated that the markets could experience hundreds of stores using this NEW GROW-RATE within six months. The technology is even ready for the home delivery market. “To set the Grow-Rate up, just add a little food and other items to your cart, then click at checkout. The Grow-Rate - which takes into account many factors including current weather and harvest figures - will automatically adjust and grow for the entire length of your shopping trip. For example, a more than average degree of heat or ice will cause the Grow-Rate to speed up, and excessive cold will slow it down.” “The Grow-Rate is for all grocery items but is especially appropriate for meat, fish, vegetables and produce. Some fruits will grow sooner than their recommended time. We encourage shoppers to continue the good thing and add more than one item if they so wish - it will just speed up the process.” “Food, like people, has individual needs and there is no one size fits all Grow-Rate. For meat, fish and meat by-products, for fruit and vegetables, and for organic, the growth rate is from 3% faster for fruit, to as much as 15%, to 8% for vegetables. Fruit, for example, will grow a little faster when temperatures are below average or when there is a decrease in humidity, or during dry periods in California, New Jersey, and many parts of the South.” “For frozen or refrigerated items, there are no time factors but many factors can slow down growth, such as hot or cold temperatures, improper sealing to avoid spoilage, prolonged storage time, and heavy traffic. Food returned from the customer will automatically slow the growth rate because of that reduction.” “In the Organic and Eco-Systems markets, the Grow-Rate must be adjusted according to organic standards. Other than that, the Grow-Rate is available to shoppers.” ↻
