I cant say how you get this, it used to show a statistics screen to create an adblocker when doing such stuff. A: The source code of the extension is here You can download the source code in the link and look for the part where the scary strings come from. LAX Man Accidentally Goes On A 2-Minute Terrible Tweets Nuclear Missile Panic Tweet to your heart's content on Twitter. In a few short minutes, Los Angeles International Airport has gone from an idyllic playground to one hell of a frightening place. In a massive Twitter mistake, a security guard accidentally launched a nuclear missile via Twitter, tweeting, "PLEASE PRAY THIS IS NOT REAL, we are evacuating LAX." L.A.X. was packed, and the last thing anybody wanted was to hear some unidentified person

yelling "WE ARE ATTACKING THE CITY" as the movies Groundhog Day and Red Dawn start playing in their heads. Advertisement - Continue Reading Below The unnamed security guard ended up deleting the tweet, and the L.A. airport was left to enjoy its much-needed downtime. The mass panic did not last long, and airline officials did not warn of any nuclear attack. "I am an old security guard," the spokesperson for the airport tweeted, "and at the time, I did not think anyone would be that stupid to bomb LAX on Twitter. I am sorry that I panicked and tweeted a lie." With much shorter words, a BlackBerry Message will tell you if your wife is back in town. "You will only receive the message on a BlackBerry messaging device if your BlackBerry Internet Service (BIS) with BlackBerry Messenger has been turned on" for the last 90 days. The only security for messaging is a hard-to-crack passcode. If you forget your code, you lose access to all other BBM services. If, however, you are located in an area with Wi-Fi, you can use the BBM WiFi feature to get online for free -- no code needed. But wait, if you're going to go that route, why not use BBM in the first place and get the cheap monthly pricing? There's no official answer, but it's possible that BBM's default data limit is pretty low, so you might be able to save a lot of money by switching to the free

of the Game - PCZ (Full Version) 2.0.0 Â· Download ringgit Indonesia to INRCIA Director John Brennan told NBC's Chuck Todd on Sunday that the Benghazi, Libya terror attack was "spontaneous" and had "nothing to do with the protests" that were occurring on September 11, 2012, the day of the attack. Following revelations by investigative reporters that led them to believe that there were protestors in the vicinity, Brennan explained that he did not see them as he was leaving the State Department that day. When asked what the CIA knew about a protest prior to 9/11, Brennan replied: We knew that there were protests in Benghazi in the week before the attack. They were very small, they were very disorganized. There was some overlap with the protests that were taking place in Cairo, but it wasn't anything that we saw, or certainly didn't see, as a threat at that time. However, State Department whistleblowers told investigators that there were, in fact, protestors in the vicinity of the consulate when he was leaving that day. According to a source, at approximately 9:42pm local time, six protesting Americans arrived at the Benghazi consulate where they greeted the CIA deputy station chief, Tyrone Woods, and presented him with a list of demands that included the removal of Ambassador Stevens and a call for the resignation of U.N. ambassador Susan Rice:

I know there is something I could do to remove the tags before I open it, but I don't really know what it is and I don't see a message explaining that. I also tried copy-paste with the find/replacing like in the example but it didn't work. Thanks. A: Add -iregex for a regexp search. This is a default search for python's IDLE editor. find. -iregex '.*]+>.*' -exec sed -i's///' {} + Q: Border Rendering Issues I have a class that extends a panel, and overrides the paintComponent method. public class BorderPanel extends JPanel { public BorderPanel() { setPreferredSize(new Dimension(100, 100)); } public void paintComponent(Graphics g) { super.paintComponent(g); g.setColor(Color.WHITE); Graphics2D g2d = (Graphics2D) g; g2d.setStroke(new BasicStroke(2));

g2d.setRenderingHint(RenderingHints.KEY_ANTIALIASING, RenderingHints.VALUE_ANTIALIAS_ON); g2d.drawRect(0, 0, getWidth() - 1, getHeight() - 1); g2d.dispose(); } } And then I have a class that extends JFrame. It creates a BorderPanel, and then adds it to itself. public class Window extends JFrame { public Window(String title) { super(title); setDefaultCloseOperation(JFrame.EXIT_ON_CLOSE); setSize(1000, 500); initGUI(); } private void initGUI() { JPanel container = new JPanel(); container.setBorder(BorderFactory.createLineBorder(Color.black));
