The game is an atmospheric platformer game with 'physics' - where you need to carefully catch the gnomes and control them by applying 'force'. The main goal is to find all the gnomes in the levels. You can easily catch the gnomes in different ways. The different 'physics' of the environment, the moving platforms and the gnomes' quirks bring an intriguing gameplay. The 'physics' are different in each level as the platforms move, crawl, float, fall and open up in a level to create different opportunities for the gnomes to jump. You can also push the gnomes onto different surfaces (e.g. walls, a ring, a lantern or the ground). To ensure that the gnomes don't fall or jump into an unwanted position you need to carefully direct their path. To catch a gnome you need to apply a high level of physical force on the gnome with the mouse. But don't try to push too hard to force the gnomes - for example, on a slippery surface or near a wall - otherwise they will move too fast and you won't be able to catch them. You get two points for each gnome you catch - the number of points is displayed on the gnomes' label. Some gnomes come with an extra point to capture (e.g. 10 points when you catch the gnome in the first level of story mode). Other gnomes have 'dynamics' that you will need to be on top of them - for example, they start flapping their feet, spread their ears wide, push their noses, swirl around or vomit water. The gnomes don't automatically make themselves known - you need to carefully track them over multiple seconds in order to find them and catch them. The gnomes can come in several different colors. You get an additional reward when you capture a gnome with a 'dynamic' behavior - this can be a bonus point, an extra power, a chance to get a power up or a speed boost. Finding and catching the gnomes also helps in clearing up the level. You get bonus points, bonus power and extra points for clearing the levels. The game contains 15 levels in the story mode and 13 in the hide-n-seek mode. Find the Gnome has 12 different types of gnomes: - Red gnomes like vegetables - Purple gnomes like vegetables and seaweed - Orange gnomes

## **What's new:**

**ed Set Activate your brilliant idea! Paco and the Tumbling Seed is the first book in a fantastic new series about a boy, his dog, and an ancient Mexican god who share physical ideas and abilities. Despite his debilitating physical disabilities, Paco López dreams of having the chance to ride on his best friend, his Tumbling Tom, an unbelievably fast superhero on wheels. When Paco accidentally runs through a wall into the Hop-Along Tumbling Show alongside Tom's flying squirrel, Racquel, he begins to uncover the secret behind the beloved character's unbelievable bravery. As the boy and his friends help Uncle Antonio regain his senses, and help the squirrel and rabbit get married to each other, Paco realizes that the tumbling has gotten too big and dangerous - and that he, Tom, and Racquel's adventures are only a glimpse of the truly incredible things to come. My Review I used to read these type of children's books when I was a kid. They used to blow my mind. Now I'm reading one again, and, I have to say, that what I once believed they were doing, they aren't doing at all anymore. I was a huge fan of this story because I had that same feeling as when I was a kid. I was fascinated to find out more in these types of stories. There were some things I found I knew not to expect, but that should have never been a surprise when they are with the kiddie books. Things like this: The book starts out with a story that has nothing to do with the end of the story. Here is what it says "At the Hop-Along Tumbling Show, A Lucky Jack Rabbit and a Flaming Squirrel (That's not a typo, it's just a mistake) had found love, and decided they wanted to get married to each other. Meanwhile, Senora López, whom called Paco's mum, went outside to check on Chucho, Paco's uncle, who was recovering from a surgery on his head. "Gathering Herbs", "It's a Pig Out", "And a Head-Healing Ceremony". Uncle Antonio comes to see if he's awake and he's in a lot of pain. Paco's**
