A list of every car is available in the 'Mod Info' menu. The default car is very basic and does not contain any upgrade options. You can chose what you want to work on for a real world feel. Flying an aircraft has been removed. Skins/HUD: The default skin is already set to look nice and in pro drift cars its very obvious which type of car it is, but skins are available for the car and can be downloaded from the website. It would be nice to see at least one screenshot (with graphical presentation) of the level before it loads. I'm not sure about my speed; what I'm seeing is that my speed isn't in sync with what it is supposed to be. I would assume that the game would have to register my current speed, and then produce it. It would be nice to see at least one screenshot (with graphical presentation) of the level before it loads. Nope, it is in full alpha mode now, but we should get some on the way. 1.
