are multiple sprites used? I would like to hear some input on this I want to make a Basic game in which you will have a character that moves left and right. I want to show the screen just like I put it into paint. The only thing is it doesn't have to be a character as long as I can show that I have drawn the graphics which means it doesn't have to be a game. Any feedback on this would be great.

Here is a video of what I have now. A: You could try running on a Swing based game like JASIGO. You can run this on Windows without an engine and perhaps have a character moving left and right. What are your concerns with a simple, basic platform? Also, JASIGO runs on most devices. You could start there. I think simple, basic, procedural or straight forward is the way to go. And, it doesn't have to be done in a language that is not easy to learn. Have you looked into Java. I have a few examples in the below link that show how you could get the basics.

It is a link in the 'Resources' section. Also, there are many development sites with tutorials. Make a list and try the Java tutorials on [Tutorials.abc.com](https://www.tutorialsabc.com)
