History of AutoCAD AutoCAD originally started life as a graphic automation package developed by Paul Driscoll and others at the University of Wisconsin at Madison (UW-Madison) between 1973 and 1975. It started out as a proof of concept system and was intended to create "animated graphic illustrations, such as navigation maps and heads-up display (HUD) of a pilot's instrument panel, or in-flight movie entertainment."1 Pilot's Instrument Panel HUD - 1977 During that period of time, computers were very expensive. The system had no mouse and had to be used with a keyboard and light pen. It was difficult to program and it was extremely expensive to have it run on a university mainframe. Pilot's Instrument Panel HUD - 1977 This early version of AutoCAD was called Graphic Processing Unit (GPU), meaning that it could be used to draw. It was developed in a room of an Engineering Sciences building at UW-Madison. This prototype was developed and

In 1995, Autodesk first introduced its visual lisp language, an extension to the AutoLISP language, to facilitate an integrated solution to e-learning and multimedia authoring, and is one of the fastest growing programming languages in the world. Visual LISP supports a wide variety of operations and interaction techniques and provides a powerful high-level programming language for animation, interaction, content management, production and distribution. Autodesk AutoCAD is a computer-aided design (CAD) software suite, which began as a program for rendering and editing drawings and diagrams. AutoCAD started as the first product in the architecture of the Digital Project Management business unit, which is now Autodesk. AutoCAD is distributed under the GNU Public License (GPL) and is free software. Software updates Software updates are released periodically for the standard version of AutoCAD. New or updated release types (including AutoCAD Architecture, AutoCAD Electrical, AutoCAD Civil 3D, and AutoCAD Certification) of AutoCAD are also available on an ongoing basis.
