Basically I want to replace the 2nd " Å " character in the URL. Is there any simple way to do this? I know i could do something like this: URL = URL.replaceAll(" Å", "A"); But it does not really seems like a good way to do it, Is there any better way? A: Actually in Java string are immutable. You need to replace the whole string which is quite complex. You can try some algorithm like this: import java.util.ArrayList; import java.util.List; import java.util.regex.Pattern; import java.util.regex.Matcher; public class Main { 6d1f23a050
