Undelete 360 ULTIMATE Version 3.1.1.244

the tether recovery has no effect on the native ledge grab limit in ultimate which is a feature that was introduced in the original brawl. in brawl anniversary edition, there is a new ledge grab limit feature introduced which makes it so you cannot grab the ledge with a tether if you have reached the ledge grab limit. after grabbing an edge with a tether, there is a short cooldown before the player can tether onto an edge again. in brawl, this cooldown is fixed to 10 seconds. in brawl anniversary edition, this cooldown is time-based and is simply calculated based on the amount of time the tether has been used, and is adjustable. if the tether is retracted and the player attempts to tether again before the cooldown ends, the tether will simply hover near the edge, and the player will have to make use of their remaining jumps. after grabbing an edge with a tether, there is a short cooldown before the player can tether onto an edge again. in ultimate, tether recoveries also count towards the newly introduced ledge grab limit. attempting to tether after the limit is reached will have the tether bounce off the ledge. simply tethering the ledge will add to the limit, even if the user does not retract the tether to grab the ledge themselves. doing so however will not add an additional grab to the limit. iobit ultimate uninstaller is an utility for removing programs from your computer. it is a replacement for the windows uninstaller, and removes programs from the registry, hidden files and other locations. it is able to uninstall 32-bit programs and 64-bit programs at the same time. it supports both 32-bit programs and 64-bit programs without any problem. it is a great tool to repair missing or corrupted programs. 5ec8ef588b
