
Trainer Do F.e.a.r 3 V16.00.20.0275 UPD

Training with history information. When true, will enable the trainer to utilize the history information. If false, no history is stored. Default: False. `random_seed` (int) Random number generator seed for the trainer. Default: 123. The function may have zero argument, or a single one containing the optuna/Ray Tune/SigOpt trial object, to be able to choose different architectures according to hyper parameters (such as layer count, sizes of inner layers, dropout probabilities etc). `compute_metrics` (Callable[[EvalPrediction], Dict], optional) The function that will be used to compute metrics at evaluation. Must take a EvalPrediction and return a dictionary string to metric values. `callbacks` (List of TrainerCallback, optional) A list of callbacks to customize the training loop.
