1) System Dump utility 2) Registry Cleaner 3) System & User Cleaner 4) Registry Registry Cleaner 5) Advanced System & User Cleaner 6) It has a built in Wizard 7) Runs as a service 8) It can be used for both 32 and 64 bit windows 9) Registry backups and restores 10) Registry Scanners 11) Super Powerful 12) Advanced Startup Options 13) System Dump, Registry Scanner, and Registry Scanners This tool will free up temporary files, uninstall software or fix the installation if required, optimise your computer and give your PC a fresh start. It helps to remove hidden or blocked registry entries that are cluttering up your PC. It's a great tool for removing unwanted programs and other unwanted software that are taking up precious space. Does your registry use too much space? Is your computer plagued with bad registry entries that you need to get rid of? You will be amazed at how much space these registry problems can free up. All registry cleaners we have reviewed work the same way. They have a tool that is capable of cleaning your registry and they all take the same amount of time to run. RegCure Free is a powerful Registry Cleaner that will help you to clean, repair and optimize your registry. It can remove unused entries, clean up the registry and help to fix installation problems. RegCure Free has a very good interface and is easy to use. After the initial scan, it will present you with a report, showing all the areas of your registry that need attention. You can now use it to clean your registry or check what is taking up all that valuable disk space. It is really simple to use RegCure Free, just click the Clean button and the registry will be fixed, cleaned up, repaired, optimized and removed. You can also run a backup and restore option if you are not happy with the results. You can even delete all the registry blobs. It will scan your registry and check all areas of it. It will then present you with a report showing where the problems are and how to fix them. It does have a help and tutorial option which you can use to learn how to use it properly. Harmony is a complete program that repairs and scans your registry, it removes unused files and directories that cause registry bloat. It can remove and prevent ads and third party add-ins from cluttering
